Application for Enterprise IT Intern – Hands-On, Innovative, and Ready to Make an Impact

Dear Circles.Life Recruitment Team,

I am excited to apply for the Enterprise IT Internship at Circles.Life. As a final-year Computer Science undergraduate at the University of Peradeniya, I have hands-on experience in system administration, troubleshooting, networking, and user support through both academic projects and leadership roles.

My technical skills include proficiency with Windows and Linux, networking (TCP/IP, LAN/WAN), Microsoft Office Suite, and IT troubleshooting. I have managed digital transformation initiatives, automated onboarding processes, and actively supported teams with rapid tech solutions. My involvement in student media societies has further strengthened my communication and collaboration abilities.

Circles.Life's drive for innovation and fast-paced growth inspires me. I'm eager to contribute my skills and energy to your team while gaining invaluable experience in global IT operations.

I appreciate your consideration.

Sincerely,

Dilshan Pathirana
