SUMMARY

Final-year Applied Science undergraduate specialising in Computer Science at the University of Peradeniya, with practical experience in software development, AI, and machine learning. A proven team player and project contributor, demonstrated through real-world academic solutions and leadership roles in student organisations. Also, an accomplished photographer and videographer, combining technical expertise with creative problem-solving. Passionate about using technology and visual storytelling to tackle real-world challenges and drive innovation.

EDUCATION

- BSc (Hons) in Applied Science (Computer Science) | Faculty of Science, University of Peradeniya
Expected Graduation: 2026
- GCE Advanced Level
2019 | Z-Score: 1.03

PROJECTS

- **AI-Powered Note-Taking Application**

July 2025

Tech Stack - Python, OCR, OpenAI API

Designed an AI-assisted tool that scans images/screenshots, extracts and structures text via OCR, and generates refined PDF notes using natural language processing APIs

- **Web Application for Assisted Package Quota Estimation**

July 2025 – Present

Tech Stack – MERN stack, Postman

Developed a user-friendly web app to dynamically generate pricing estimates for media service packages based on client input and preferences.

- **Fish Tracking and Distance Analysis System**

July 2025 – Present

Tech Stack: Python, OpenCV, NumPy, Matplotlib, Multiprocessing

Built a tool to analyse top-down fish tank footage by tracking centroid movements, generating heatmaps, calculating distances travelled in cm, and batch-processing videos in parallel.

- **Camera Shop & Rental Management System**

May 2025 – Present

Tech Stack - Spring Boot, MySQL, RESTful APIs, Postman

Developed a full-stack web app for camera sales and rentals with secure user authentication, real-time inventory, and an admin dashboard.

- **Long-Term Efficiency Prediction of Solar Panels Using Machine Learning**

Apr 2025 – Present | University of Peradeniya

Tech Stack - Python, Pandas, Scikit-learn, TensorFlow, Keras

Building ML models (RNNs, LSTMs) using NASA POWER data to forecast solar panel efficiency and guide sustainable energy planning.

- **Selective File Copying Application for Photo Editors**

Apr 2025 – May 2025 | University of Peradeniya

Tech Stack - Python

Automated selective photocopying streamlines client requests and reduces manual effort for editors.

- **Web Application & Resource Management System – perabeats Media Society**

May 2024 – Oct 2024 | University of Peradeniya

Tech Stack - MERN Stack, Postman

Created a platform for event coordination and equipment booking, digitising manual workflows for greater efficiency.

SKILLS

- Languages: Python, Java, C, JavaScript, HTML, CSS
- Frameworks/Libraries: React.js, Node.js, Express.js, Spring Boot, OpenCV, TensorFlow, Scikit-learn, Keras, NumPy, Matplotlib
- Databases: MySQL, MongoDB
- APIs & Tools: RESTful APIs, Postman, Git, VS Code, Microsoft Office, Adobe Suite, OpenAI API, Tesseract OCR
- Concepts & Methodologies: Full-Stack Web Development, Machine Learning, OCR, Image Processing, Real-Time Data Handling, Batch Processing, Data Visualisation, Agile
- Soft Skills: Teamwork, Effective Communication, Adaptability, Problem-Solving, Leadership, Time Management

CERTIFICATIONS & AWARDS

- Member of the Year – Videography, Perabeats Media Society, 2024

EXTRACURRICULAR ACTIVITIES

- Editorial Panel Member, Robarosiya Society, 2023–2024
- Member, Perabeats Media Society, 2023–2024
- Executive Committee Member, Perabeats Media Society, 2024–2025

LANGUAGES

- English (fluent)
- Sinhala (native)
